

Ref: RM-10641

As an amateur radio operator for over 20 years, a repeater trustee, and the current RACES officer for the City of San Antonio, I see no benefit to either part of RM-10641. First, RM-10641 assumes a problem exists, but it neither demonstrates that a problem exists nor does it demonstrate how the recommended actions would correct the problem.

I do not see that this action would help alleviate intentional interference or illegal use of transmitters. I do not see how it would help law enforcement track offenders. I do see problems for retailers, on-line sales, and catalog sales.

This is a poorly conceived petition and it should be dismissed. It does not warrant serious consideration.
